

USoft training and coaching

USoft offers tailored training and coaching programmes that will help you become proficient in using USoft technology.

Training USoft Platform Basics

3 days

Euro 3.000,- pp

The USoft Platform Basics training programme is intended for all those involved in implementing the USoft platform, whether in an existing IT-landscape or as a stand-alone application. When you complete this programme, you will be able to implement and configure the software that leverages the USoft rules engine. This programme takes 3 days to complete.

Training USoft Services

2 days

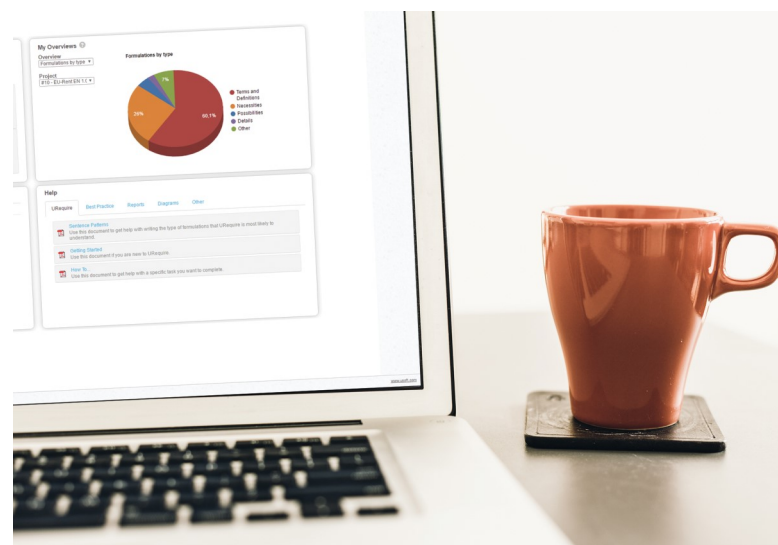

Euro 2.000,- pp

This training programme enables you to design and implement the deployment of USoft rules engines in complex IT-landscapes and to create REST or SOAP services that offer machine-to-machine communication with the rules engine, for example, for the orchestration of information processes across an organisation with many stakeholders. This programme is for moderately technical people, who can configure and customise

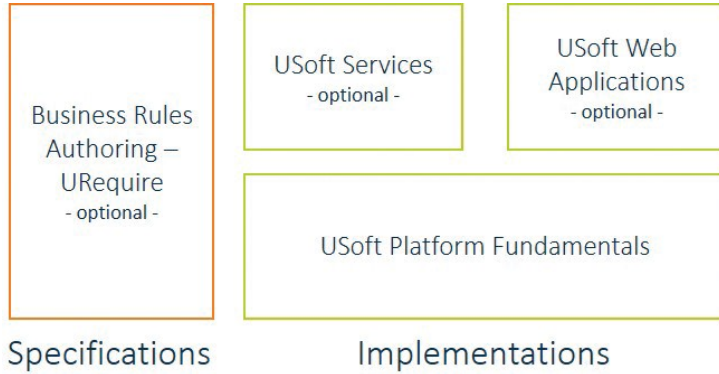

generated code. It is a prerequisite that you complete the USoft Platform Basic Training Programme beforehand.

Prerequisite knowledge skills

Basic data modelling skills and an understanding of SQL are a prerequisite. USoft offers separate 1-day introduction programmes and 1-day refresher courses in these subjects. Mainstream programming skills in languages or frameworks such as Java, .NET or JavaScript are not required. Knowledge of XML/XSLT is helpful but not required.

Get certified in USoft technology

Training USoft Web Applications

2 days
Euro 2.000,- pp

This training programme enables you to create highly maintainable HTML-based user interfaces on top of the USoft rules engine, leveraging USoft's capability to generate a combination of rules-based logic and default user interfaces from a data model with business rule implementations. This programme is for moderately technical people, who can work with an environment coded in HTML/CSS/JavaScript. It is a prerequisite that you complete the USoft Platform Basics training programme beforehand.

Training Business Rules Authoring - USoft Studio

2 days
Euro 1.300,- pp

This 2-day USoft Studio awareness course enables you to use the USoft rules-based platform to full effect by learning how to express business rules optimally in English or in Dutch. For this course, OMG's Semantics for Business Vocabulary and Rules (SBVR) standard is the frame of reference, and the USoft-owned USoft Studio tool for business rule specification is used as a vehicle. Relationships with neighboring modelling techniques such as BPMN, DMN and Enterprise Ontology are discussed, as well as the relationship with requirements analysis, requirements management, and agile methodology. This programme is suitable for business consultants. There are no specific prerequisites.

Become proficient in USoft Technology

Each training programme is a series of interactive sessions with an experienced practitioner of USoft technology and applications.

The normal training takes place at our head offices in Naarden, The Netherlands. Training dates will be planned in consultation. We offer in-company training upon request. Please contact us for a specific quotation.

About USoft

USoft is a global software provider with 30 years of experience. We enable organisations to become smarter and more efficient in their business processes. We are experts in areas including privacy, customer experience and real-time decision making.

Our truly low-code development platform allows you to simply model your ideas while working software is automatically created by the platform. Our software uses the concept of business rules which contributes to flexibility, ready to test and optimise and to align with the required business value. It is built on the concept that even complex software should be easy to build and maintain. Furthermore, our Service Framework makes it easy to connect to other applications.

USoft is a privately-owned company headquartered in The Netherlands, with additional offices in the UK and Serbia. We serve a broad range of customers in the sectors of financial services, healthcare, aviation, transportation and government. Find out more at www.usoft.com
